TANMAY AGRAWAL

Raipur, Chhattisgarh | +91 7389840050 | tanmayagrawal2907@gmail.com | LinkedIn | GitHub

PROFILE

Aspiring Data Analyst with hands-on experience turning large, messy datasets into structured, decision-ready insights using SQL, Excel, and Power BI. Skilled in root-cause analysis, data validation, and stakeholder-ready reporting — built through real-world software engineering work on production data systems and self-directed analytics projects.

EDUCATION

Vellore Institute of Technology **Sep 2022 – Aug 2026**
B.Tech in Computer Science Engineering — CGPA: 9.09 / 10 *Vellore, India*

WORK EXPERIENCE

Zenoti India Private Limited **Jan 2026 – Jul 2026**
Software Development Engineer Intern *Hyderabad, India*

- **Conducted root-cause analysis and SQL query debugging** across **30+ pages** of shared grid/data-rendering issues, partnering with engineering and QA to resolve data-accuracy defects and improve reporting reliability.
- **Diagnosed 10+ customer-reported production incidents** through systematic, evidence-based quantitative cross-checking, and led end-to-end QA testing for the Discounts V2 feature to validate data accuracy pre-release.
- **Queried and optimized SQL stored procedures and data workflows** to strengthen data validation and secure export logic, fixing a platform-wide CSV/Excel export defect and eliminating **6 OWASP-flagged** data-integrity and access-control issues.
- **Authored 12 internal API specifications** defining data request/response schemas, validation rules, and versioning standards — translating technical logic into clear, structured documentation for the Discounts & Vouchers modules.

Aligned Automation **Dec 2024 – Jan 2025**
AI and Python Intern *Pune, Maharashtra*

- **Engineered an AI-Powered Chat Assistant** using TinyLlama-1.1B and FastAPI, achieving **90% faster inference** through GPU acceleration (DirectML).
- **Enhanced Model Reliability and Performance** by implementing code-detection pipelines, structured error handling, secure API endpoints, reducing system failures by **35%.**

PROJECTS

Enterprise Medallion Data Warehouse & Power BI Analytics Platform | SQL Server, T-SQL, Power BI, DAX Github

- **Designed and architected an enterprise-grade Medallion Architecture data warehouse** (Bronze/Silver/Gold) in SQL Server, integrating disparate ERP and CRM data into a unified Star Schema model covering **100K+ sales records**.
- **Formulated and answered 15 strategic business questions** with production-grade SQL — including Pareto 80/20 revenue analysis, customer segmentation, and month-over-month growth velocity — using window functions (LAG, RANK, NTILE).
- **Delivered 3 interactive Power BI dashboards** (Executive, Customer, Product) translating raw data into decision-ready metrics on revenue, profit, customer value, and product performance for non-technical stakeholders.

Retail Analytics & Customer Intelligence Platform | SQL Server, Power BI Github

- **Constructed a Bronze-Silver-Gold retail analytics warehouse** processing **1M+ transactions** using SQL Server and dimensional modeling.
- **Implemented RFM segmentation, cohort analysis, CLV modeling, and Pareto analysis** to evaluate customer behavior and revenue drivers.
- **Developed 4 Power BI dashboards** delivering insights into customer retention, product performance, geographic trends, and executive KPIs.

Placement Mail Automation | Python, GPT-4o, Gmail API, Google Calendar API, Pandas Github

- **Created an automated placement intelligence system** integrating Gmail and Google Calendar APIs to extract, process, and schedule placement-related events from CSV/XLSX/PDF documents, reducing manual effort by **80%**.
- **Developed a classification pipeline** using GPT-4o and rule-based heuristics, achieving **95%+ accuracy** in identifying genuine shortlisting notifications and automating calendar event generation.

TECHNICAL & ANALYTICAL SKILLS

Data Analysis & Visualization: Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, conditional formatting, data validation, formula-based modeling), Power BI (DAX, Power Query, Interactive Dashboards), SQL Server, MySQL.

Programming & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn), SQL, JavaScript, FastAPI.

Tools & Platforms: Jupyter, Github, JIRA, Docker.

Relevant Coursework: Database Management Systems, Operating Systems, Computer Networks, OOPS.

CERTIFICATIONS

- The Complete SQL Bootcamp (30 Hours): Go from Zero to Hero | Udemy
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Certificate

EXTRA-CURRICULARS & LEADERSHIP

- **Student Coordinator, GraVITas Techno-Management Fest (2024)** — Certificate
- **Student Volunteer, Ic-ETITE Conference (2024)** — Certificate
